恐龍生態濫觴於距今約2億年前的三疊紀。發展約1億年後，白堊紀的恐龍多樣性更高，有些恐龍類群能適應不同環境，並發展出特化食性。

繼114年發行「恐龍郵票小全張」後，本公司續以4種蜥臀類恐龍發行郵票小全張1張，內含面值15元郵票4枚，圖案簡介如下：

- 一、棘龍（面值15元）：屬棘龍類，頭部狹長、牙齒圓錐形，前肢強壯並有巨爪，顯示牠們生活在河岸或水邊，適合捕食魚類。巨大體型和搶眼背帆，是牠們最著名的特徵。
- 二、西峽爪龍（面值15元）：屬阿爾瓦雷茲龍類，這個家族的恐龍特徵是前肢特別短小，體型小巧敏捷，適合高速奔跑。
- 三、哈茲卡盜龍（面值15元）：演化自馳龍類或傷齒龍類等小型敏捷肉食恐龍，腳上依然保留第二趾爪子特別大的特徵。牠們的形態與現在水鳥及鴨子相似，推測腳趾上長有腳蹼，用來划水游泳。
- 四、單爪龍（面值15元）：屬阿爾瓦雷茲龍類，前肢第一指爪子相當大，古生物學家推測牠們用爪子挖掘蟻穴、專門吃白蟻為生，生態在恐龍家族中獨樹一幟。

The origin of dinosaurs can be traced back to the Triassic Period, about 200 million years ago. After about 100 million years of evolution, dinosaurs in the Cretaceous Period showed immense diversity. There were numerous species, with some adapting to vastly different environments and evolving specialized diets.

Following the release of the “Dinosaurs Souvenir Sheet” in 2025, Chunghwa Post has issued a new souvenir sheet featuring four types of saurischian dinosaurs. This sheet contains four stamps, each with a denomination of NT\$15. A brief description of the designs follows:

1. *Spinosaurus* (NT\$15): A member of the Spinosauridae family, it features a long, narrow head and conical teeth. Its strong forelimbs are equipped with giant claws, indicating its habitat of riverbanks or waterside, and adaptation of preying on fish. Its massive body and eye-catching dorsal sail are its salient characteristics.
2. *Xixianykus* (NT\$15): A member of the Alvarezsauridae family, it had exceptionally short forelimbs and a compact, agile body built for speed.
3. *Halszkaraptor* (NT\$15): Evolved from small, agile carnivorous dinosaurs such as dromaeosaurids or troodontids, it retained an enlarged claw on its second toe. Morphologically, it was similar to ducks and other modern waterfowl, and it is hypothesized that they had webbed feet for swimming.
4. *Mononykus* (NT\$15): A member of the Alvarezsauridae family, it featured a large thumb. Paleontologists hypothesize that they used these claws to dig into ant nests and were particularly adapted to feeding on termites, occupying a unique ecological niche among dinosaurs.
